PROJECT EXPERIENCE

Zenvy – AI Lifestyle & Wellness App 🔗

12/2025 – 02/2026

UI/UX Designer | Mobile App Design

- Designed a multi-feature mobile application including Mood Tracker, To-Do List, and Habit Tracking with Friends to support users' productivity and emotional well-being
- Followed an end-to-end UX design process, creating wireframes, low-fidelity, and high-fidelity prototypes to ensure intuitive and user-friendly experiences
- Built a community platform enabling users to share quotes, life stories, and motivational content to improve engagement and connection
- Developed an AI-powered feature set including Skin Care Tracker, Wardrobe Assistant, Kids Story Generator, and Mood-based Sound Player
- Designed dashboards to improve task tracking and user engagement with visual insights using calendar views to track habit, mood, and skincare progress
- Focused on user-centered design, usability, and maintaining a clear visual hierarchy

INFORMATION LEAKAGE DETECTION AND PREVENTION

12/2024 – 03/2025

- Developed Information Leakage Detection & Prevention System using ASP.NET, C#, and SQL Server.
- Implemented data allocation strategies to improve detection of data leakage without modifying original data.
- Added fake data injection technique to identify unauthorized access and detect the guilty party.
